

## Installation Instructions

Thanks for choosing the free edition of spodtronic! We are happy to have You as a user in the worlds most innovative and fast growing mobile radio community.

This version is compatible with: Nokia E60, E61, E61i, E65, E70, N71, N73, N80, N91, N93, N93i and N95 models.

To install spodtronic, move the file

**spodtronic\_3.1.0\_series60v3\_en.sis**

from the folder "Symbian Series 60 v3.x" to your phone either by using a cable from your PC or using a bluetooth or another wireless connection.

After that, install the application and follow the instructions.

You might need to change the settings of your program manager as follows:

Program Installation: All

Certificate Check: Off

We will update more exciting radio stations regularly, so tune in.

### **Important:**

Listening to radio and podcasts via UMTS will create a lot of download traffic! Make sure you have a "flat rate" for data downloads in your contract with your operator as the unlimited download of sound can become very expensive quickly!

If in doubt, ask your operator!

Best wishes,

- Your spodtronic team.
